reinvent the 'peel' introducing bliss peeling groovy

You're only as young as you 'peel', and with diligent use of this dew, you're sure to appear a heck of a lot younger than your years. Introducing **peeling groovy**, the product previously known as Sleeping Peel Serum, with a new name and a new look. But fans of the former formula, don't fret! It's still the same dermatologist-developed, spa-strength anti-aging serum you've grown to adore. Because, hey—when it's that good, why reinvent the 'peel'?

peeling groovy facial serum

This gently exfoliating leave-on formula is a triple threat against aging: it simultaneously perfects skin's texture, lightens dark spots (from sun, breakouts or other complexion-related mishaps) and lessens the look of lines and large pores.

peeling groovy facial serum 1oz \$65

in'spa'ration> our estheticians recommend applying a thin layer of Peeling Groovy from hairline to collarbone, on the back of the hands, or on a sun damaged or droopy décolleté.

blisstip> AHAs (alpha hydroxy acids) often cause irritation, redness and flaking—three words no one wants to hear in the same sentence as 'skin'. **Peeling groovy** uses dermatologist-developed AFAs (Filaggrin-based amino acid antioxidants) that are shown to be extremely non-irritating, and are completely safe for all skin types. And, as if that weren't enough reason to bid AHAs "adieu," AFAs have an added bonus: they attract up to three times the normal levels of moisture, which helps support healthy skin function.
